

FERRETTI 720 PROJECT: FERRETTI YACHTS, AT FULL VOLUME

Ferretti Yachts, one of the icons of Italian-made luxury and a historical Ferretti Group brand, presents Ferretti 720 Project, an innovative project developed from the working relationship between Studio Zuccon International Project, AYT – Advanced Yacht Technology,

"Ferretti 720 will touch the water for the first time in spring 2011 and we have high expectations for this model. The resulting yacht features a winning, sporty exterior line, a new concept roll bar, hard top on request, and continuous glazing which runs right along the main deck. Large windows positioned so they light up the guest and VIP cabins at bow have been added to the open views fitted in the hull.

Ferretti 720 Project measures almost 22 metres in length and almost 6 in width. Inside, she features generous spaces, further enlarged by the natural light which filters in through the large windows.

Full and empty spaces alternate elegantly, resulting in a well-balanced, lightweight appearance, and the low pieces of furniture are highly functional, whilst still allowing ample room for the windows. Spatiality is intensified by the natural light, adding to the pleasure of being on board.

Ferretti yachts is exclusively represented in India by
