

Pershing's first three-engine yacht

The launch of the new Pershing 108 in the Adriatic Sea was a big day for the company, as they now have a three-engine yacht to their credit. Designed by Fulvio De Simoni, in collaboration with the AYT (Advanced Yacht Technology) of the Ferretti Group and the team of architects and designers of the Centro Stile Ferrettigroup, the new boat is a class-leading craft, with a versatile layout and innovative technology on board. The standard version of the Pershing 108 has three diesel 1600 Hp MTUs and, thanks to the three surface propellers, it reaches a maximum velocity of 40.5 knots. With a single central operating engine, it is possible to cruise at 11 knots with extended range; useful when the boat needs to go from one place to another with lower fuel consumption, and safer night sailing.

New CEO at Ferretti

Giancarlo Galeone has been appointed the new Chief Executive Officer of the Ferretti Group, after the sudden demise of Salvatore

Basile due to a heart attack. Basile has been at the helm of the company since 2009, and Galeone worked in close cooperation with him on the Board of Directors, in defining the reorganisation and relaunch plan, sharing the same vision and strategies.

Ferretti Group Chairman and Founder Norberto Ferretti, the Board of Directors, the Executive Committee and the entire Ferretti Group team, together with shareholders Mediobanca and Yacht Participation, a company headed by Norberto Ferretti, have expressed their satisfaction at the appointment of Giancarlo Galeone. He is a man of proven experience in the nautical sector and of great strategic vision, representing a significant choice in the projects of expansion and further development that the group has been pursuing over the past years.
