## A NEW WAY TO CRUISE ABOARD THE SUN ODYSSEY 30i

*Experience the pleasure of waking up aboard the swing-keel version of the Sun Odyssey 30i, on a beach surrounded by transparent waters and sandy dunes!*

With this new swing-keel model, it's even easier to «beach» nearly anywhere and to rediscover the simple pleasures of cruising.

To attain .85 metres of draught with the board up, she is equipped with a short keelbox with wings, for easy adjustment of the centreboard from the cockpit using the coachroof winch.

Ideal for families and couples alike, she can be beached without effort on her keel and twin rudders. The Sun Odyssey 30i, designed by Marc Lombard and built by Jeanneau, opens up a world of possibilities for exploring new coastlines.

The interior layout offers the same space and comfort as the standard version, since the swing-keel system is entirely contained in the keelbox.

Sailing, she is well balanced and extremely stable, affording remarkable comfort in this category of sailboat for a truly competitive price from 58 510 € , w/o VAT \*.

### **TECHNICAL SPECIFICATIONS**

**Overall length : 8,99 m**
