## WATCH OUT FOR HIGH AESTHETICS IN THE FERRETTI YACHTS 650!

Presented for the first time at the 2014 edition of the Cannes Yachting Festival, the Ferretti Yachts 650 immediately strikes the eye for its truly distinctive profile. Its outer silhouette is characterized by a flybridge equipped with an aerodynamic hard top and new fiberglass decorative elements that "cut" through the profile of the glazing in the superstructure. An unprecedented decoration connects the windows of the three cabins below deck, providing the craft an even more captivating look. Its slender lines are further enhanced by the yacht's aft area, specifically designed to ensure easy and safe tender handling and increase the guests' on board comfort. A tender lift, which can lodge an over 9 feet tender and be lowered by 3 feet with respect to its original position, has been installed on the yacht to handle the tender without any davit. It allows a comfortable access to the sea, also thanks to some built-in steps. The Ferretti Yachts 650 is equipped with two Caterpillar engines, CAT C18, allowing the yacht to reach a cruising speed of 26 knots and a maximum speed of 30 knots.
